

Review guide

Introduction

Ava - Movie Assistant is a free Android app that helps to discover movies, find out where to watch them and track your watched movies, ratings, Watchlist and collection.

The app doesn't only target movie enthusiasts, but helps everyone discover what to watch next!

Discover movies

Movies can be discovered by several recommendation lists, upcoming cinema releases, movie trailers and customizable discover criteria.

These criteria can be used to filter movie lists by the personal movie taste and favored streaming services.

Search

Movies, people and tags can be found easily using the *search* function.

There are *Ava search shortcuts* that can be accessed quickly from other apps through the *context menu* of a text selection or through the *share function*.

Movie details

The *movie details* contain general information like *release dates*, *age ratings*, *runtime*s, *movie genres* and information about *involved actors*, *actresses* & *crew members*.

In addition, available *streaming services* and *ratings* from the most popular movie platforms (*IMDb*, *Rotten Tomatoes*, *Metacritic*, *Trakt.tv* & *TheMovieDB*) are shown.

Movies Lists Library

Streaming services

Streaming services can be favored or hidden.

The *Discover* section, the *Watchlist* and many *movie lists* can be filtered by the *favored streaming services*.

Person details

Beside some general information, the *person details* offer a selection of the movies the cast or crew member is *known for* and their *complete filmography*.

Watchlist

Movies can be added to the *Watchlist*, which is located in the *Lists* section.

The *Watchlist* can be quickly filtered by several criteria like:

- Available to...
 - stream on a subscribed streaming service
 - stream for free (or with ads)
 - rent or buy digitally
- Movie is marked as collected
- Runtime, genres, highly rated & more

Notifications

By default the users will be notified when a movie on their *Watchlist* gets available to stream on a *favored streaming service*.

In addition notifications for *buy and rent availabilities, movie releases and new videos* can be enabled.

Actions

In addition to the *Watchlist*, movie enthusiasts and collectors have more options to manage their movies. They can be *rated*, *marked as watched* and *collected* or added to personal *movie lists*.

My movies

All watched, rated and collected movies will be shown in the *My movies* section and can be sorted and filtered by various criteria.

Designs

Besides the *light Design*, a *dark Design* is also available by default. To support the development of *Ava - Movie Assistant* a third '*AMOLED Black Design*' can be unlocked via an in-app purchase.

Themes

In addition the UI can be customized with various themes that can be unlocked via in-app purchases.

UI & UX

The intuitive experience and appealing user interface were developed to make movie discovery and management a relaxed and good experience.

TheMovieDB

The movie information displayed in *Ava - Movie Assistant* is requested by the TMDb API.

TheMovieDB is a community built movie and TV show database with more than 750,000 movies and 2,500,000 people.

This product uses the TMDb API but is not endorsed or certified by TMDb.

Ava Mobile

Ava - Movie Assistant is developed by *Ava Mobile*.

The company was founded in the year 2020 and is based in Münster, North Rhine-Westphalia, Germany.
